## JUMP START DUAL BATTERY KIT INSTALLATION

### JUMP START DUAL BATTERY KIT.

REDARC's Jump Start Ready Dual Battery Kit is perfect for people wanting to charge auxiliary batteries. It provides peace of mind in case of start battery failure.

This dual battery setup kit offers everything you need if you're looking to run things like fridges, inverters and other 12 volt devices.

The jump start capability means, in the event that your start battery is advertently discharged, you have the ability to easily jump start your vehicle at the push of a button.

This wiring diagram can show you how.

The 25 amp BCDC will charge your batteries (60 to 200Ah) while you're on the move and features Green Power Priority so you can add a solar blanket or portable solar panel and harness the sun's energy when you're set up at camp and get batteries back up to 100% charge.

### YOU WILL NO LONGER BE TROUBLED BY:

- Smart alternators
- Voltage drop from long cable runs
- Inability to fully charge a secondary battery of different chemistry to the start battery
- Over-charging your secondary batteries leading to damage and failures
- Limited charging levels resulting in reduced battery output.

### 25 AMP JUMP START DUAL BATTERY KIT CONTENTS:

- BCDC1225D
- FK40
- SBI12
- FK100

### 40 AMP JUMP START DUAL BATTERY KIT CONTENTS:

- BCDC1240D
- FK60
- SBI12
- FK100
